

It's time to call his bluff.....

Prime Minister Stephen Harper - February 6, 2007
(an excerpt from his speech to the Canadian Club)

*"My children, your children and all children
deserve to grow up in a world where they have
clean air to breathe and clean water to drink.
They deserve well-tended land that will sustain
healthy crops and livestock.*

*And they deserve large tracts of unspoiled
wilderness, sanctuaries that not only preserve
our precious flora and fauna, but also provide
opportunities for increasingly urbanized human
beings to connect with the natural world."*

**Call or write the PM, and ask him if the children of
southwestern British Columbia are included in his speech.**
